Carmelita's Dormitory

Overall System Test Flow

Role-by-role module checklist | October 12, 2026 | Asia/Manila

Use this document to run the whole application in a consistent order. Each role has its own ordered modules, actions and expected results. This is a test plan; the checks have not been marked as passed.

Role order

Owner setup > Caretaker operations > Tenant workflows > Guardian visibility > Cross-role verification

Stage	Purpose
1. Owner	Create configuration, rooms, accounts, contracts, assignments and guardian links. Seed notices and operational records.
2. Caretaker	Check operational tools and permission limits using the Owner setup. Return here after Tenant submissions.
3. Tenant	Complete onboarding, check room/bills, submit requests/reports and exercise manual and automatic payments.
4. Guardian	Check linked-resident visibility, documents, payment status, curfew endorsement and communication.
5. Return to staff	Finish approvals and decisions, then verify Tenant/Guardian updates. Run departure tests last.

Before the first test

Prepare one Owner, one Caretaker, two active Tenants, one incomplete Tenant, one restricted Tenant, one linked Guardian and one unlinked Guardian. Prepare a separate Tenant for move-out/eviction tests. Use at least two rooms and available/occupied beds.

Record build, platform, test environment and account labels. Use synthetic records. Apply required migrations and deploy matching functions. For the advance-payment build, apply 202610120001_paymongo_advance_rent.sql before deploying paymongo-payments and releasing the app.

Run PayMongo in sandbox first. Record whether demo_test_credits is enabled: sandbox credits affect balances only when this setting is enabled. The local payment demo never updates real bills.

Status key: P = Pass | F = Fail | B = Blocked | N/A = Not applicable. Attach evidence and defect IDs. Record work-in-progress/preview features separately; a placeholder screen is not proof of completed functionality.

Owner | modules 1-9

Follow this order within the Owner role. Complete staff-dependent outcomes after the related role submits its records.

Flow: O01 > O02 > O03 > O04 > O05 > O06 > O07 > O08 > O09

ID	Module	Actions and expected result	Result
O01	**Login & role access**	**Test:** Sign in with valid and invalid credentials. Reopen the app and attempt another role workspace. **Expected:** Correct Owner workspace; invalid login and unauthorized routes are rejected.	____ P / F / B / N/A
O02	**Dashboard & navigation**	**Test:** Open dashboard cards, Operations, search, filters and mobile/web menus. Compare counts with source records. **Expected:** Links open the correct module; counts agree with the records.	____ P / F / B / N/A
O03	**Dormitory configuration**	**Test:** Review report categories, payment methods and common areas. Add or deactivate a test option and reopen its form. **Expected:** Saved active options appear; inactive choices cannot be newly selected.	____ P / F / B / N/A
O04	**Floors, rooms & beds**	**Test:** Create test floors, rooms and beds; review floor plan, capacity and occupancy. Try a duplicate or invalid entry. **Expected:** Room identities and bed availability remain consistent; invalid records are rejected.	____ P / F / B / N/A
O05	**Accounts & invitations**	**Test:** Create Tenant, Guardian and Caretaker test accounts; validate duplicates and invitation flow. Test account status changes. **Expected:** Correct roles and account states persist; invitations route to the intended account.	____ P / F / B / N/A
O06	**Tenant onboarding**	**Test:** Open tenant directory and onboarding checklist. Review profile, emergency contact, IDs, lease upload and signature. **Expected:** Missing requirements are visible; verified details and documents belong to the correct tenant.	____ P / F / B / N/A
O07	**Contracts & deposits**	**Test:** Create and activate a contract with dates and rent; inspect generated monthly bills. Record a separate security-deposit receipt. **Expected:** Correct contract months are generated once; deposit receipt remains separate from monthly rent.	____ P / F / B / N/A
O08	**Room assignment & transfers**	**Test:** Assign an available bed, try an occupied bed, then process a transfer/amendment. Recheck old and new occupancy. **Expected:** No double assignment; room, bed and transfer history match the active assignment.	____ P / F / B / N/A
O09	**Guardian links**	**Test:** Link a Guardian to a Tenant; verify linked visibility. Switch linked tenants and test an unrelated account. **Expected:** Only linked tenants are visible; link changes persist without cross-tenant leakage.	____ P / F / B / N/A

For each module: save/reopen the record, test invalid inputs, check access scope, and record evidence. Menu locations may differ between mobile and web; staff tools also appear under Operations.

Owner | modules 10-18

Follow this order within the Owner role. Complete staff-dependent outcomes after the related role submits its records.

Flow: O10 > O11 > O12 > O13 > O14 > O15 > O16 > O17 > O18

ID	Module	Actions and expected result	Result
O10	**Billing & adjustments**	**Test:** Inspect rent and utilities; create utility allocations and an approved additional charge. Exercise rent override and bill-management actions. **Expected:** Amounts and periods are correct; changes are audited and do not duplicate bills.	____ P / F / B / N/A
O11	**Manual payments**	**Test:** Review a tenant proof, approve one and reject another with notes. Record a staff receipt and test a partial payment. **Expected:** Only verified amounts reduce balances; receipt, reviewer, date and remaining balance are correct.	____ P / F / B / N/A
O12	**Automatic / advance payments**	**Test:** Enable configured PayMongo sandbox. Review selected-month requests, overlap protection, confirmation and reconciliation (Tenant T07-T08). **Expected:** Only Owner changes collection mode; confirmed months credit once and retain their breakdown.	____ P / F / B / N/A
O13	**Income, expenses & analytics**	**Test:** Create a sample expense and inspect financial totals, reporting filters and trends. Compare collected totals with verified ledger entries. **Expected:** Amounts reconcile; pending, rejected and demo labels are handled consistently.	____ P / F / B / N/A
O14	**Maintenance & confidential reports**	**Test:** Review tenant submissions; assign, update and resolve maintenance. Review confidential reports and authorized follow-up/addenda. **Expected:** Correct lifecycle and history; confidential details stay restricted to authorized viewers.	____ P / F / B / N/A
O15	**Cleaning & inspections**	**Test:** Set cleaning rotation/override and record a missed duty. Schedule a room inspection, add findings/evidence and publish permitted results. **Expected:** Correct tenants and room receive schedules/notices; findings and evidence stay attached to the record.	____ P / F / B / N/A
O16	**Conduct & disciplinary records**	**Test:** Create a test conduct case; publish a response request, review tenant response/appeal, and inspect disciplinary history. **Expected:** Case status, evidence, decision and audit history remain consistent; records stay scoped.	____ P / F / B / N/A
O17	**Visitors, curfew & work profiles**	**Test:** Review visitor requests and check-in/out; inspect curfew requests, work-curfew profiles and presence records. Test boundary tools separately. **Expected:** Permitted transitions persist; guardian/staff handoff is correct. Curfew/geofence release status is explicitly recorded.	____ P / F / B / N/A
O18	**Notices, communication & closure**	**Test:** Publish a targeted notice and send a test message. On a separate departure account, test eviction notice, inspection, settlement, owner approval and final closure; review retention access. **Expected:** Correct recipients receive notices; only authorized Owner decisions finalize closure and approved deposit outcomes.	____ P / F / B / N/A

For each module: save/reopen the record, test invalid inputs, check access scope, and record evidence. Menu locations may differ between mobile and web; staff tools also appear under Operations.

Caretaker | modules 1-7

Follow this order within the Caretaker role. Complete staff-dependent outcomes after the related role submits its records.

Flow: C01 > C02 > C03 > C04 > C05 > C06 > C07

ID	Module	Actions and expected result	Result
C01	**Login & operational dashboard**	**Test:** Sign in; open cards, Operations and menus. Attempt Owner-only Contracts, analytics, financial settings and collection-mode actions. **Expected:** Operational workspace loads; Owner-only actions remain unavailable and are rejected if attempted directly.	____ P / F / B / N/A
C02	**Accounts & tenant directory**	**Test:** Create permitted Tenant/Guardian accounts and view tenant records. Try creating an Owner/Caretaker or altering protected account fields. **Expected:** Permitted account work succeeds; privileged role creation and protected changes are blocked.	____ P / F / B / N/A
C03	**Rooms & assignments**	**Test:** Inspect occupancy and beds; perform permitted assignment/transfer steps. Attempt assigning the same bed twice. **Expected:** Correct availability and occupancy persist; conflicting assignments are rejected.	____ P / F / B / N/A
C04	**Billing & utilities**	**Test:** Inspect tenant balances and utility allocation workflow. Attempt an Owner-only non-utility charge or rent-rate override. **Expected:** Permitted utility work succeeds; Owner financial approvals remain protected.	____ P / F / B / N/A
C05	**Manual receipts & proof review**	**Test:** Record a received payment with amount, receipt and date. Review permitted proofs; retry a receipt and inspect partial balances. **Expected:** Receipts are recorded once; allowed review updates only the appropriate bill.	____ P / F / B / N/A
C06	**PayMongo requests**	**Test:** Expand an active multi-month breakdown; check status and cancel a pending request. Attempt a staff receipt for a covered month. **Expected:** All covered months are visible; cancellation is provider-confirmed and active overlap blocks a receipt.	____ P / F / B / N/A
C07	**Maintenance management**	**Test:** Open a Tenant maintenance report; assign, update progress, add completion details and close it. Reopen the record history. **Expected:** Updates persist and appear in the Tenant view with correct status and history.	____ P / F / B / N/A

For each module: save/reopen the record, test invalid inputs, check access scope, and record evidence. Menu locations may differ between mobile and web; staff tools also appear under Operations.

Caretaker | modules 8-14

Follow this order within the Caretaker role. Complete staff-dependent outcomes after the related role submits its records.

Flow: C08 > C09 > C10 > C11 > C12 > C13 > C14

ID	Module	Actions and expected result	Result
C08	**Confidential reports**	**Test:** Open authorized confidential reports, add permitted follow-up and inspect access boundaries. **Expected:** Only authorized records are visible; follow-up preserves original content and authorship.	____ P / F / B / N/A
C09	**Cleaning schedules & reports**	**Test:** Review rotation, test an override and submit a missed-duty record with evidence. Check Tenant schedule/report visibility. **Expected:** Correct room and affected resident are selected; changes and evidence persist.	____ P / F / B / N/A
C10	**Room inspections**	**Test:** Schedule or update permitted inspection records; add findings/evidence and review published notices. **Expected:** Correct room records and notices; inspection steps do not finalize Owner settlement decisions.	____ P / F / B / N/A
C11	**Conduct cases & appeals**	**Test:** Create/update permitted operational case steps and review a resident response. Attempt Owner-only eviction decisions. **Expected:** Case history is consistent; Owner decisions remain protected.	____ P / F / B / N/A
C12	**Visitors, curfew & work profiles**	**Test:** Approve/reject permitted visitor requests and record visits. Process permitted curfew/work-profile steps and inspect presence history. **Expected:** Permitted transitions and notifications are correct; WIP presence functionality is recorded separately.	____ P / F / B / N/A
C13	**Departure & settlement support**	**Test:** Review a test departure case; record operational inspection/clearance details and a deduction proposal. Attempt final financial approval. **Expected:** Operational preparation persists; Owner approval and final financial decisions remain protected.	____ P / F / B / N/A
C14	**Communication, retention & profile**	**Test:** Publish a permitted notice; send a message and open alerts. Review retention permissions, edit profile/settings and sign out. **Expected:** Correct recipients and access scope; only authorized settings save and logout clears the session.	____ P / F / B / N/A

For each module: save/reopen the record, test invalid inputs, check access scope, and record evidence. Menu locations may differ between mobile and web; staff tools also appear under Operations.

Tenant | modules 1-8

Follow this order within the Tenant role. Complete staff-dependent outcomes after the related role submits its records.

Flow: T01 > T02 > T03 > T04 > T05 > T06 > T07 > T08

ID	Module	Actions and expected result	Result
T01	**Login & access gate**	**Test:** Sign in as a new, incomplete, active and restricted Tenant. Try another role route and another Tenant record. **Expected:** Access follows residency/onboarding state; other roles and unrelated tenant records are blocked.	____ P / F / B / N/A
T02	**Onboarding & requirements**	**Test:** Complete personal/emergency details; upload IDs and lease, sign on screen and revisit checklist. Try missing fields or unsupported files. **Expected:** Validation works; files/signature persist and incomplete requirements remain visible.	____ P / F / B / N/A
T03	**Home & shortcuts**	**Test:** Open Home cards, summary totals and each shortcut. Compare displayed room, next bill and report status with module details. **Expected:** Home reflects the correct tenant and opens the intended records.	____ P / F / B / N/A
T04	**My room & contract**	**Test:** Inspect bed, room, roommates, facilities, contract and security-deposit information. Recheck after an Owner assignment/transfer. **Expected:** Only the tenant assignment and allowed resident details appear; transfer data stays consistent.	____ P / F / B / N/A
T05	**Billing & future rent schedule**	**Test:** Open all bills, current balances, filters and future rent schedule. Compare periods and dates with the active contract. **Expected:** Current outstanding and scheduled future rent are distinguished; paid/voided bills are handled correctly.	____ P / F / B / N/A
T06	**Manual payment proof**	**Test:** In Manual mode, submit a reference, receipt and partial amount. Test invalid/over-balance amounts; follow staff approval and rejection. **Expected:** Proof stays pending until verified; accepted amounts reduce balances and rejection notes are visible.	____ P / F / B / N/A
T07	**PayMongo month selection & QR**	**Test:** In Automatic mode, select one rent month, then multiple months; deselect all. Check dates, balances and total, then generate one QR. **Expected:** Correct month breakdown and combined amount; empty selection cannot pay; one request covers selected rent bills.	____ P / F / B / N/A
T08	**PayMongo outcomes & saved breakdown**	**Test:** Simulate success, failure, cancellation and expiry; leave/reopen a request. Reopen each paid bill breakdown and repeat status refresh. **Expected:** Success credits each month once; other outcomes do not credit. Saved months/reference persist; overlaps are blocked.	____ P / F / B / N/A

For each module: save/reopen the record, test invalid inputs, check access scope, and record evidence. Menu locations may differ between mobile and web; staff tools also appear under Operations.

Tenant | modules 9-16

Follow this order within the Tenant role. Complete staff-dependent outcomes after the related role submits its records.

Flow: T09 > T10 > T11 > T12 > T13 > T14 > T15 > T16

ID	Module	Actions and expected result	Result
T09	**Maintenance reports**	**Test:** Submit issue details and evidence; inspect staff updates, add permitted follow-up and cancel an eligible report. **Expected:** Own report progresses correctly; invalid submissions and forbidden transitions are rejected.	____ P / F / B / N/A
T10	**Confidential reports**	**Test:** Submit a test confidential concern and evidence; inspect own status and permitted addenda. Try another Tenant report. **Expected:** Own records remain accessible; unrelated tenant/confidential data stays private.	____ P / F / B / N/A
T11	**Cleaning schedule & records**	**Test:** Open current rotation and overrides; inspect own published missed-duty records. Recheck after staff updates. **Expected:** Correct room/resident duties and dates appear; private operational data is not exposed.	____ P / F / B / N/A
T12	**Room inspections**	**Test:** Open an inspection notice, findings and permitted evidence; test acknowledgement/response where offered. **Expected:** Published information belongs to the tenant room; unpublished staff records stay restricted.	____ P / F / B / N/A
T13	**Conduct responses & appeals**	**Test:** Open own case, submit a response/appeal and follow staff decisions. Attempt changing a staff decision. **Expected:** Response and history persist; only permitted own-case actions are available.	____ P / F / B / N/A
T14	**Visitor requests**	**Test:** Request a visit; test invalid dates/details, staff rejection/approval and scheduled visit history. **Expected:** Requests belong to the correct tenant; only valid schedules and allowed status transitions succeed.	____ P / F / B / N/A
T15	**Curfew, work profile & presence**	**Test:** Submit an exception with dates/reason; exercise Guardian endorsement and staff review. Check work-profile evidence and location permission states. **Expected:** Correct approval chain and own history; unavailable location is not presented as confirmed presence. Record WIP status.	____ P / F / B / N/A
T16	**Communication, profile & departure**	**Test:** Read notices, send messages and open alerts; edit profile/settings and sign out. With a separate departure Tenant, test move-out request, notices and settlement visibility. **Expected:** Correct recipient scope and session behavior; own departure status is visible without staff financial privileges.	____ P / F / B / N/A

For each module: save/reopen the record, test invalid inputs, check access scope, and record evidence. Menu locations may differ between mobile and web; staff tools also appear under Operations.

Guardian | modules 1-5

Follow this order within the Guardian role. Complete staff-dependent outcomes after the related role submits its records.

Flow: G01 > G02 > G03 > G04 > G05

ID	Module	Actions and expected result	Result
G01	**Login & role access**	**Test:** Sign in with valid/invalid credentials; reopen app and attempt Tenant/Owner/Caretaker workspaces. **Expected:** Guardian workspace only; invalid login and unauthorized role routes are rejected.	____ P / F / B / N/A
G02	**Linked-tenant selection**	**Test:** Test no link, one link and multiple links; switch the active resident and attempt an unrelated tenant record. **Expected:** Empty state is clear; every module follows the selected linked resident only.	____ P / F / B / N/A
G03	**Home & tenant information**	**Test:** Compare Home summary with resident contact, room, bed, residency and school information. Refresh after staff changes. **Expected:** Correct linked resident and allowed profile/assignment details; changes appear on refresh.	____ P / F / B / N/A
G04	**Payment status**	**Test:** Inspect linked bills before and after manual and PayMongo payment; verify current outstanding versus scheduled rent. **Expected:** Correct linked balances/status; Guardian cannot verify payments or change collection settings.	____ P / F / B / N/A
G05	**Documents**	**Test:** Open linked contract, lease and permitted document checklist/downloads. Attempt editing files or viewing another tenant document. **Expected:** Permitted documents are view-only; unrelated or unauthorized files cannot be accessed.	____ P / F / B / N/A

For each module: save/reopen the record, test invalid inputs, check access scope, and record evidence. Menu locations may differ between mobile and web; staff tools also appear under Operations.

Guardian | modules 6-10

Follow this order within the Guardian role. Complete staff-dependent outcomes after the related role submits its records.

Flow: G06 > G07 > G08 > G09 > G10

ID	Module	Actions and expected result	Result
G06	**Curfew endorsement & presence**	**Test:** Endorse and decline linked curfew requests; test remarks, status history, alert time and permission/unavailable states. **Expected:** Endorsement does not bypass required staff review; linked presence and alerts are accurate. Record WIP status.	____ P / F / B / N/A
G07	**Notices**	**Test:** Open published guardian/linked-resident notices and filters. Check expired or differently targeted announcements. **Expected:** Only notices relevant to the Guardian are shown; links open the correct content.	____ P / F / B / N/A
G08	**Messages**	**Test:** Send and receive permitted staff/resident messages; check unread counts, history and contact visibility. **Expected:** Correct recipients and thread history; unauthorized conversations are not exposed.	____ P / F / B / N/A
G09	**Notifications & resident notices**	**Test:** Trigger test payment, curfew and relevant departure notices; open them and mark read. Switch linked tenant and refresh. **Expected:** Alerts reach intended accounts and correct records; inaccessible destinations reveal no private data.	____ P / F / B / N/A
G10	**Profile, settings & logout**	**Test:** Edit allowed profile fields; check theme, password and notification preferences. Log out then attempt reopening a protected page. **Expected:** Allowed changes persist; protected resident/staff fields stay locked and logout ends access.	____ P / F / B / N/A

For each module: save/reopen the record, test invalid inputs, check access scope, and record evidence. Menu locations may differ between mobile and web; staff tools also appear under Operations.

Cross-role handoffs

Run after the role checklists. Return to the original role to confirm the final outcome.

ID / scenario	Role sequence	Expected result
X01 Onboarding	Owner creates account/contract > Tenant completes requirements > staff reviews permitted steps > Owner assigns bed > Guardian checks linked details.	One consistent resident identity, active assignment and requirement state across roles.
X02 Manual payment	Tenant submits partial proof > Owner/Caretaker verifies or rejects > Tenant and Guardian refresh balances/history.	Only verified amount is credited; rejection leaves balance unchanged and shows the review result.
X03 Advance PayMongo payment	Tenant selects November/December > reviews breakdown > generates one request > simulates success > staff checks ledger > Tenant reopens receipt > Guardian checks balances.	November remaining PHP 3,000 + December PHP 3,500 = PHP 6,500; each month is credited once, with one provider reference.
X04 Payment conflict	Create a multi-month request > attempt overlapping request/staff receipt > change or void a selected bill > confirm provider payment.	Overlap is blocked. Changed balance/voided bill sends the entire received payment to needs_review; no partial month credit.
X05 Reports & room care	Tenant reports maintenance/concern > staff updates it; staff publishes cleaning/inspection records > affected Tenant checks permitted details.	Correct status, evidence, room and notifications; confidential and unpublished records stay restricted.
X06 Curfew & visitors	Tenant requests exception > Guardian endorses/declines > staff performs permitted final review; Tenant requests visit > staff records permitted visit transitions.	Correct approval chain and recipient scope; actual presence/location testing remains a separate WIP/integration check.
X07 Communication	Staff publishes targeted notice > Tenant/Guardian reads it; exchange permitted messages > recipients open notifications.	Correct audiences, thread history, unread state and notification destinations; unrelated users receive no private content.
X08 Departure & closure	Separate Tenant requests move-out, or Owner publishes test eviction decision > staff inspects/prepares settlement > Owner approves/finalizes > Tenant/Guardian check allowed notices.	Clearance, approved deductions, deposit outcome, contract status and released occupancy remain consistent.

Payment example: set November rent to PHP 3,500 and first verify a PHP 500 manual payment. Keep December unpaid at PHP 3,500. Complete all payment conflict variants on separate bills to preserve the happy-path evidence.

Final system checks & run record

Apply these checks across all four roles before signing off the build.

Check	Actions	Expected
Access isolation	Switch users on the same device; open old pages and direct record links; verify Tenant A/Guardian A cannot access Tenant B.	No stale account data, cross-role writes or unrelated private records.
Platform & layout	Run staff workflows on web and mobile, and resident workflows on supported phones; test narrow screens, keyboard, long text and uploads.	No clipping or blocked controls; equivalent actions retain the same permissions.
Refresh & network recovery	Save on device A, refresh device B, background/resume, interrupt network, retry and reopen records.	Saved data persists; failures are clear; retries do not duplicate writes or credits.
Files & notifications	Test allowed and invalid uploads, restricted downloads, denied permissions, foreground/background alerts and notification links.	Files stay scoped; notification destinations and unread counts are correct.
Totals & audit history	Compare room occupancy, verified collections, bills, contract schedules, reports and departure state across related pages.	Source records and summaries agree; changes retain actor/date/history.
WIP & external integrations	Record curfew/geofence WIP behavior, physical-device location results, feedback preview behavior and PayMongo sandbox configuration.	Completed, blocked and preview-only behavior are distinguished; external processing is not inferred from a UI screen.

Test run record

Tester: _____ Date/time: _____
